SUMMARY

Computer Science undergraduate with hands-on experience in Data Analytics, AI-driven application development, and full-stack engineering. Worked as a Data Analyst Intern at ONGC using SAS Analytics to analyze datasets and build visual reports for data interpretation. Built multiple AI-based systems including healthcare chatbots, automation platforms, and ML-powered prediction models using Flask, React, MySQL, and REST APIs. Experienced in problem-solving, product development, and translating real-world ideas into scalable technical solutions through internships, hackathons, and startup initiatives.

TECHNICAL SKILLS

Programming Languages	C++, Python, Java, JavaScript
Web & Backend	React.js, Flask, Node.js, REST APIs, System Design
AI / Data Analytics	Machine Learning, Computer Vision, Prompt Engineering, LLM Integration, SAS Analytics, Data Visualization
Databases	MySQL
Tools & Platforms	Git, GitHub, Jinja2, Gmail API, Excel, Google Sheets

PROFESSIONAL EXPERIENCE

ONGC – Data Analyst Intern May 2024 – Jul 2024

- Worked on SAS Analytics to analyze operational and statistical datasets for business reporting and visualization.
- Designed dashboards and visual representations to analyze HIV-related global datasets and identify meaningful trends.
- Performed data cleaning, preprocessing, and transformation on multi-source datasets to improve reporting accuracy.
- Generated analytical reports and insights for stakeholders using structured visual dashboards and statistical analysis.

ENTREPRENEURIAL EXPERIENCE

Co-Founder – Yocto (Hyperlocal Medicine Delivery Startup) 2023 – 2024

- Designed operational workflows and delivery processes for a hyperlocal medicine delivery platform.
- Coordinated with vendors and cross-functional teams to streamline execution and improve delivery efficiency.
- Conducted user research and analyzed customer pain points to refine business operations and delivery strategies.
- Managed documentation, communication workflows, and execution planning across different business functions.

PROJECTS

AutismAI – Early Autism Detection System

- Built a machine learning-based autism detection system using behavioral and M-CHAT datasets.
- Applied classification techniques and computer vision concepts to improve prediction accuracy and analysis.

AI Doctor Chatbot

- Developed a healthcare chatbot using Flask backend, Gemini API integration, and MySQL database.
- Implemented REST APIs and prompt engineering techniques to improve AI-generated medical responses.

R-Mail – Email Automation System

- Developed an automated email management platform using React, Flask, Node.js, and Gmail OAuth.
- Integrated frontend, backend, and API workflows to build a complete automation pipeline.

ACHIEVEMENTS

- **Flipkart GRID 6.0** – Qualified Level 1 of Flipkart’s national engineering challenge.
- **Execute 3.0 Hackathon, DTU** – Secured Top 10 position for rapid product prototyping and solution building.
- **IdeaSpark, SRM** – Ranked among Top 10 teams for innovative startup idea presentation.

EDUCATION

SRM Institute of Science and Technology	2023 – 2027
B.Tech in Computer Science and Engineering	CGPA: 8.73/10

CERTIFICATIONS

- SAP Certified – Data Analyst (SAP Analytics Cloud)
- SAP Certified – Generative AI Developer
- Deloitte Data Analytics Simulation
- Tata Cybersecurity Simulation
- Google GenAI Study Jam – Rank 14
